

Easily Reconfigure Radios with Over-the-Air Programming

Remotely reconfigure radios while in the field with the CS-OTPM1 OTAP (Over-The-Air-Programming) Manager. The system operator can edit channels, call lists, status message lists and more, without the need to return the radios to the base station.

IDAS™
ICOM DIGITAL ADVANCED SYSTEM

NXDN™

● Transmit only the changed data

Radios can reconfigure in a short period of time by transmitting only the updates.

● Single programming data can transmit to a whole fleet with only one click

● Up to 10,000 sessions are logged for review and rescheduling

● Both original and new data can be kept in the radios until the OTAP process is completed

● Define the radio update schedule

- Auto Restart: After the new data is received, radios will automatically restart and reconfigure.
- Next Power-up: After restarting the radios, they will reconfigure.
- Reactivation Key: Pressing the emergency key while restarting will reconfigure the radios.
- Specified Time: You can specify a time to reconfigure the radios.

● System operator can change language setting of CS-OTPM1

● Manages up to 100,000 radios

● CS-OTPM1 OTAP manager interface example

Icons clearly show status of radios.

Character size is selectable from small, regular and large (photo shows large size).
