XT400 SERIES
ON-SITE TWO-WAY BUSINESS RADIOS AND ACCESSORIES

BUILT TOUGH TO DO BUSINESS BETTER

XT400 Series two-way radios have the business smarts to help people work better together – coordinating resources at the construction site or monitoring production on the manufacturing line. They come with the right credentials to give business the competitive edge: exceptional quality, affordability and durability to outlast high noise, tough conditions and hard use.

KEY BENEFITS

WORK TOGETHER EFFICIENTLY AND SAFELY

Focus on the job with instant push-to-talk and customisable channel announcements that let you know which channel and which department you are talking to without removing the radio from your belt. The XT400 Series delivers loud and clear audio output thanks to its powerful built-in loudspeaker so messages are heard first time. The user can select between all 16 analogue PMR446 channels[1] with 219 privacy codes to help ensure a clear signal and to give greater options to reduce interference from others.

CONNECT EASILY THROUGHOUT THE WORKPLACE

XT400 Series radios make it easy to get your work done. Compact yet performance-packed, the XT400 Series provides coverage up to 16,250 square metres, 13 floors or 9km line of sight[2] with voice prompts that enable you to programme non-display radios on the go. A carry holster with swivel belt clip lets you rotate the radio to fit comfortably and move freely while picking up a tool or restocking a shelf and the antimicrobial coating helps prevent the growth of mould and germs on the surface of the radio – as you change shifts, pass on the radio confidently.

KEEP ON TALKING IN TOUGH CONDITIONS

XT400 Series is built to last. It is IP55 rated and is designed to meet Military Standard 810 C, D, E, F and G. These radios also undergo Motorola Solutions unique Accelerated Life Testing (ALT). This rigorous laboratory testing simulates up to 5 years of field use. We design and build the XT400 Series right the first time to minimise costly repairs and downtime.

COMMUNICATE EFFORTLESSLY WITH WORKGROUPS

XT400 Series is designed to be simple to use with clear controls and 2 programmable buttons that give quick access to commonly-used functions. A talk permit tone and roger beep can be set to give users an audible indication that the channel is ready for them to speak.
